### Description

Wheels on the bus never sounded so good! Remixed by a NYC DJ and sung by Julie Dicterow, a singer in songs for seeds, an award winning Manhattan children's music program, this is one kid-friendly app that you will actually enjoy listening to!

Your toddler calls the shots by tapping any part of the bus, which cues that verse of the song. This app reinforces the audio-visual connection and empowers your child to hear each verse when they want to hear it and as often as they want to hear it.
